

Please amend the present application as follows:

Claims

The following is a copy of Applicants' claims that identifies language being added with underlining ("___") and language being deleted with strikethrough ("—"), as is applicable:

1. (Currently Amended) A method for processing sending information in a sending device, comprising:

receiving an entry input by a user at the sending device, the entry comprising sending information that identifies a destination to which information is to be sent by the sending device;

responsive to the entry, cross-referencing the user-entered sending information with a contacts database that contains recipient sending information of the user to determine if the user-entered sending information matches sending information saved in the contacts database, wherein the contacts database is stored within memory of the sending device; and

automatically caching the user-entered sending information in the contacts database if the user-entered sending information has not been previously saved.

2-4. (Canceled).

5. (Previously presented) The method of claim 1, further comprising providing previously saved sending information to the user if it matches sending information entered by the user.
